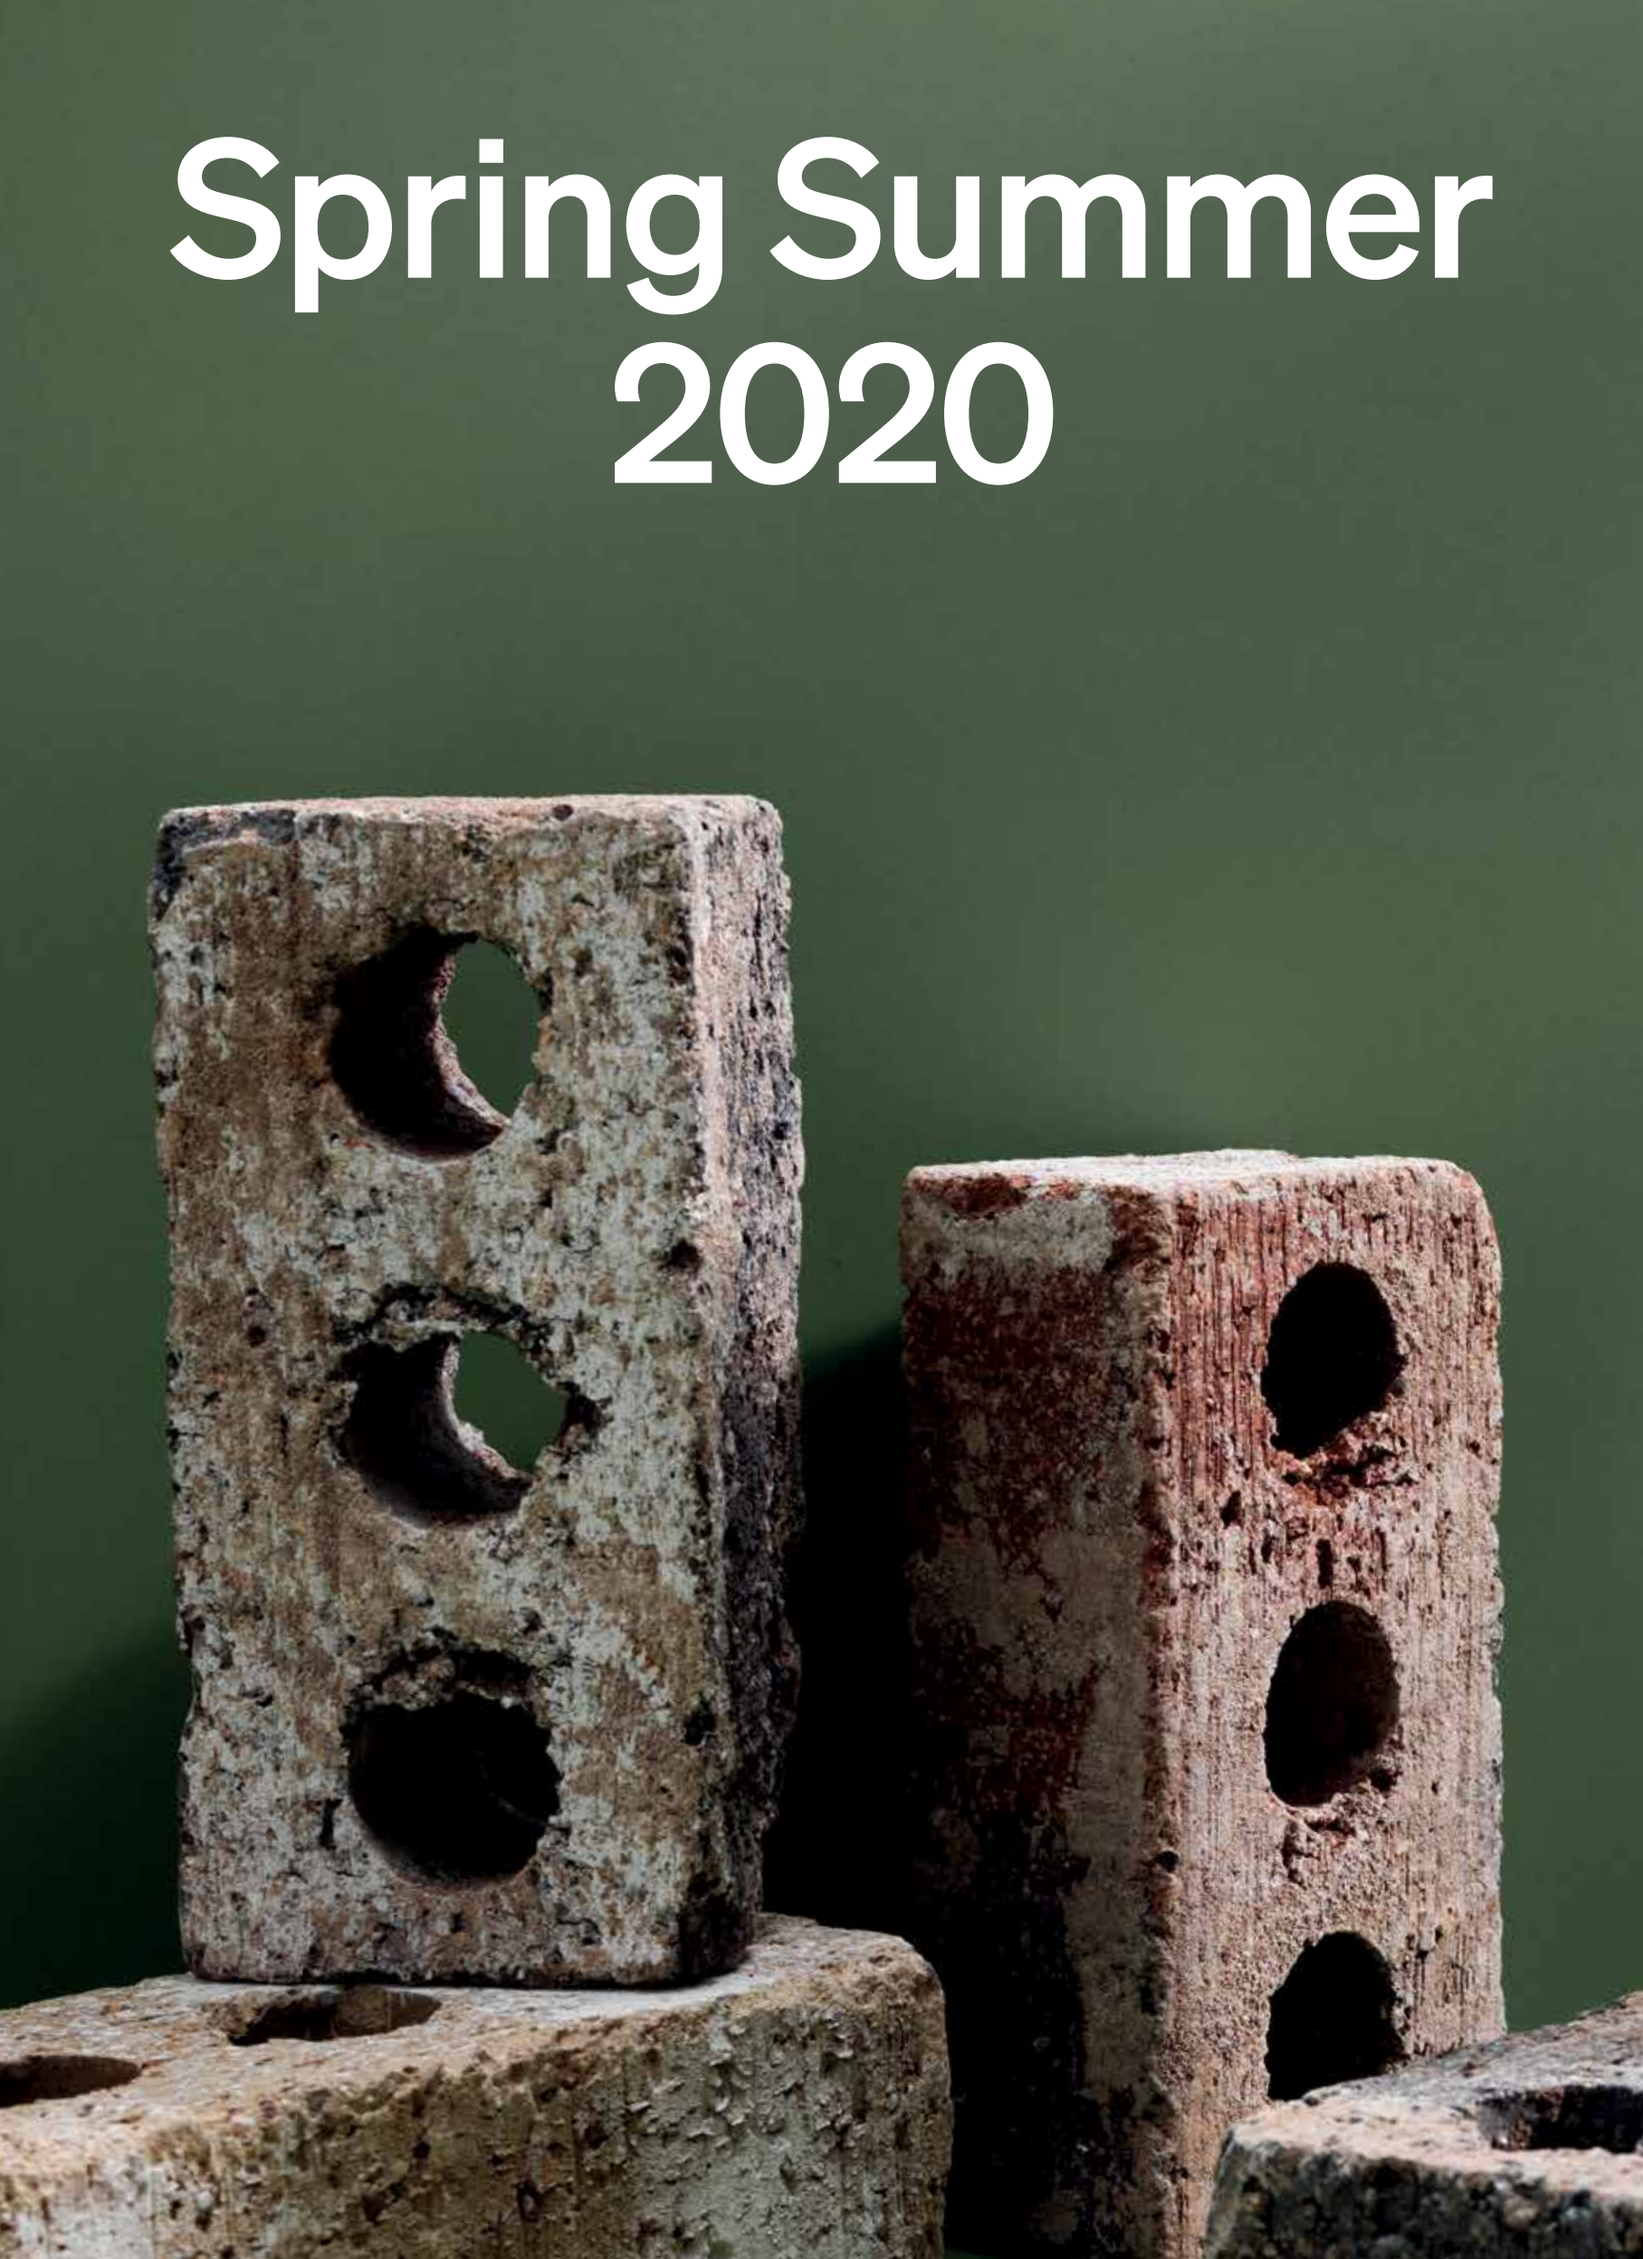
Spring Summer 2020



Inspired by Innovation

Our Spring Summer 2020 collection has been curated to bring together a refreshed range of long-established classics, and extraordinarily beautiful new innovations in brick from around the world. All designed to inspire, excite and endure.

Our Range

New Arrivals

Sculptured Sands P.08
Strongly sculptural, yet with a soft finish for extra depth and variation.

Mineral Contours P.16
Inspired by the colours of our rich and diverse Australian landscapes.

Stratos Series P.24
Moody and dramatic, this range exudes sheer elegance and confidence.

Domain Range P.30
Traditional bricks designed to recreate a natural dappled light effect.

Laneway P.36
Inspired by the back streets of Melbourne for an instantly modern look and feel.

Fringe Range P.42
Creative, colourful, and made for original ideas that are a little bit different.

Each brick product in our Spring Summer 2020 collection is a celebration of extraordinary craftsmanship and cutting-edge research and development. Designed to offer exceptional quality and visual appeal, we have hand-selected and enhanced our range to cover everything from traditional design applications, to contemporary commercial projects.

New Arrivals (continued)

Forest P.48
Richly coloured and refined in texture, Forest adds a stunning contemporary edge.

Nelissen P.54
Tactile, rustic and bespoke bricks made in Belgium to be eye-catching anywhere.

Overland P.64
Tasmanian in origin, yet universally admired, this range is naturally beautiful.

La Paloma Series P.72
Vibrant, stylish and exuberant – just like Spain where this dynamic range is from.

Updated Classics

Bowral Blends P.86
A contemporary refresh of a much-loved Australian classic that's timelessly appealing.

Panorama 50 P.96
Slimmer lines and an elegant profile makes these bricks ideal for statement projects.

Opaque Collection – From left to right: Quartz, Arenite, Olivine, Calcite, Quartz

Sculptured Sands

Naturally durable,
with genuine character.

Our new Sculptured Sands range is inspired, and largely formed, by nature.

–

We've carefully selected high quality sands and perfected contemporary firing techniques to create a modern twist on a 200-year old classic. Created to offer visual appeal with a range of multi-hued soft colours and signature velvet-sand surfaces, these extraordinary bricks are as tactile as they are beautiful.

Our two contemporary collections, Natural and Opaque, offer subtle yet distinctive differences. Both embody strong sculptural appeal with their gentle imperfections and subtle folds. Their earthy, natural forms make them ideal for accent features in both residential and architectural applications where a high contrast is desired.

Our Natural range has been crafted to offer a more traditional sandstock look, whereas Opaque offers a ceramic clay coating for extra depth and variation, particularly where a recycled or more authentic feel is needed.

Natural Collection – From left to right: Granite, Siltsonte, Beach, Ochre, Magnetite, Granite, Volcanic Ash

Natural Collection – From left to right: Granite, Siltsonte, Beach, Ochre, Magnetite, Granite, Volcanic Ash

Natural Collection

With a broad range of contemporary colours, this naturally elegant collection is adorned with a light application of sand to ensure a harmonious relationship in any environment – indoors or out.

Opaque Collection

These bricks benefit from an extra layer of kiln-fired clay and contrasting limewash to offer a layer of outstanding sophistication and texture, that allows for a softer dappled light effect.

Mineral Contours

The welcoming colours of Australian landscapes,
in a timelessly appealing form.

—

Our master brickmakers have spent years researching and developing this contemporary collection. Created by experts, brought to life by your imagination.
–

Minimalistic, sleek and modern, these bricks are the result of outstanding craftsmanship and leading-edge innovation. Crafted from some of the finest white clays in Australia, their subtle matte colours and gentle speckled surfaces bring an incredibly elegant natural stone finish to interior and exterior projects.

Inspired by the colours of Australian landscapes, the colour range is intentionally unconventional and contemporary – hinting at mid-century modernism with a touch of indulgent exuberance. Just like the landscape which has been enjoyed for millenia, the colours in this range are enduring and will never fade.

On the surface, the Mineral Contours collection is almost naturally perfect and invitingly tactile, yet their development has been the result of years of work utilising sophisticated kiln processes. These bricks are ideal for feature walls, custom builds, columns and more, indeed, anywhere that requires an architecturally designed statement to be made.

From left to right: Gypsum Tan, Feldspar Taupe, Mineral Sand, Mica Grey

Colours

The gentle colour variations in this range were all inspired by the country we call home. From the warm sands of our magnificent coastal beaches to the wide, dusty expanses of the outback, each tone has been meticulously crafted by our master colour specialists.

Stratos Series

–

Victorian Exclusive

A celebration of our dramatically beautiful coastal environments.

–

Inspired by Australia's magnificent coast, this vibrant collection is a masterclass in finesse and elegance.

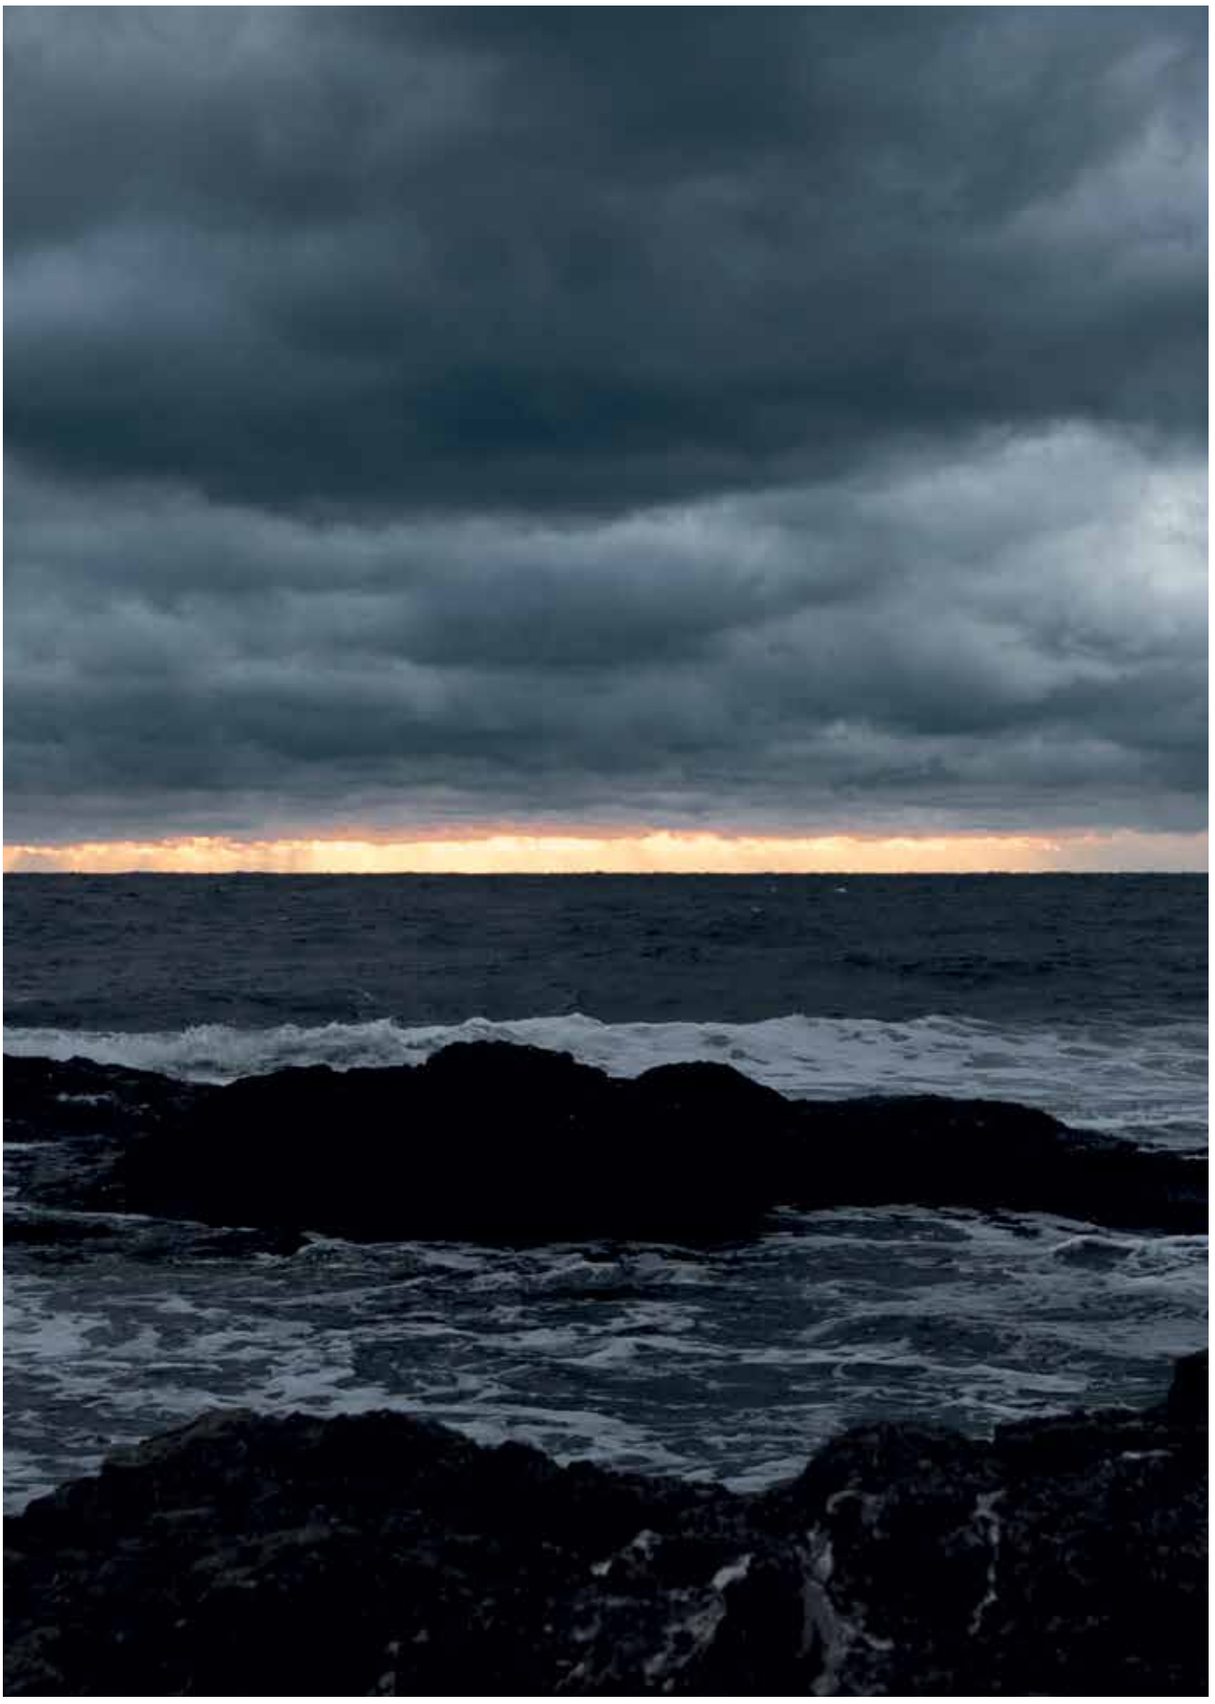
–

As a country all too familiar with big skies, storm clouds and dappled sunlight on the ocean, it's little wonder these popular bricks are a favourite in modern homes and commercial projects. With their variegated marbling, natural greys and lush marbled finishes, it doesn't take a lot of imagination to connect this special range to the coastal landscapes which surround us.

Perfect for architectural highlights or strong focal points, the Stratos Series creates a dramatic visual punch – yet can work seamlessly within existing layouts and designs due to their extraordinary natural colours.

With their subtly textured faces, this collection has been crafted for designs that require a nuanced statement that epitomises refinement and natural elegance.

*Only available in Victoria



From left to right: Thunder Grey, Nimbus Black, Alto Silver, Rain Burst, Rain Burst

Colours

From brooding storm clouds to misty rain and coastal dust storms, the colours for this range are naturally sensual and can work well as feature walls, highlights or large planes which create engaging colour contrasts that will endure well beyond any fashion trends.

Domain Range

–

Victorian Exclusive

Make home feel like a haven
with an Australian classic.

–

The Australian desire to own a home is powerful – and this collection makes building those dreams a reality.

–

Confident, subtle and robust, this classic favourite is inspired by gentle sunlight through trees, and it's this gently filtered light and mid-tone contrast that new home owners in particular are drawn to. There's a timelessness and durability attached to these bricks too, providing a welcome feeling of strength and protection.

That doesn't mean the Domain Range is for traditional builds only, having been used to great effect across a range of applications from small homes to significant architectural builds that require presence and elegance.

This inviting collection works in harmony with just about any surrounds from urban to rural environments, and allows great flexibility to blend in or stand out, while enveloping homes in a timeless, strong natural material.

*Only available in Victoria

Laneway

nubrik®
authentic brickwork

Inspired by Melbourne's maze of
back lanes and streets.

–

With a rich history of brickmaking, Melbourne is deservedly one of Australia's most cosmopolitan cities. The romance and class of this magical place is brought to life with our Laneway collection.
–

Inspired by the character and rustic charm of Melbourne's famous back streets and laneways – where pressed bricks such as these are plentiful and inviting – Laneway is not only a tribute to the craft of Australian brickmaking, but also a thoroughly modern design statement.

With their inner city character and gentle colour variations, the manufacturing marks and kiln burns are intended to reflect the timeless authenticity of the materials. Made using traditional presses, each brick has an authentic look and a genuine presence to give an age-old grounding to even the most contemporary of applications.

Vibrant and creative – just like the city that inspired them – the Laneway collection is perfect for designs where seamless blending of form and colour is required. Grounded, rustic and robust, these bricks have a heritage feel, yet with a modern twist.

From left to right: Hoiser Blustone, Weathered Red, Hardware Grey, Fitzroy Blend

Colours

With their soft colour variations, manufacturing marks and kiln burns, they are a delightful tribute to the craft of brickmaking over the ages. These solid tumbled bricks are made on presses that instil a unique look and feel in each brick. From rich, classical reds with light and dark hues, to the ‘bluestone’ tonal greys, they offer an innovative connection to an age-old tradition.

Fringe Range

Delightfully different,
but completely contemporary.

–

Looking for something a little more original? Explore your creative side with an urban ‘festival for the eyes’.

–

Innovation meets inspiration in our Fringe Range. Exuberant, individual and perhaps even a bit quirky, this range will ignite interest and inspire originality in just about any design where an edgier – but no less sophisticated – look is required.

Named in celebration of the colourful arts festivals, these bricks lend themselves to the spirit of adventure. Uncompromisingly bold, street-ready and eye-catching, they’re at home in commercial projects as well as bespoke building projects where a confident, creative touch is needed.

Part of the appeal comes from their glorious inconsistency – celebrating the natural flaws, colour variations and textures of brickmaking techniques that are centuries old. Yet the modern techniques used to create them are cutting-edge.

Colours

Our darker hues were inspired by the gently lit interiors of richly coloured reds found in cabaret clubs and intimate theatres, while the deep and light greys offer bold contrasting statements. Eye-catching and warm, it's a range designed to be both eclectic and exciting.

Forest Range

Inspired by South Australia's
most beautiful natural habitats.

–

Naturally beautiful and with a diverse colour spectrum, our Forest Range has been designed to be authentic.

–

South Australia has a rich history of brickmaking, and the Forest Range brings that history right up to date for projects seeking an authentic provenance. Made from locally sourced clays and colourful oxides, each brick has been carefully designed to exude a grounded realness, but with a contemporary edge.

Authentic in their material origins but with five exciting colourways, these gently textured bricks are equally at home in traditional builds and architectural projects – particularly where expressive designs are required.

Lush, richly textured and rustic, they are a perfect example of the craft of brickmaking expertise.

From left to right Morialta, Penola, Cleland, Blackforest, Crawford

Colours

With a refined and rich contemporary colour palette, this range encompasses natural lighter tones as well as darker hues – but all with subtle surface variations due to innovative kiln techniques.

Nelissen

Beautifully tactile and appealingly rustic –
these Belgian bricks bring class to any design.

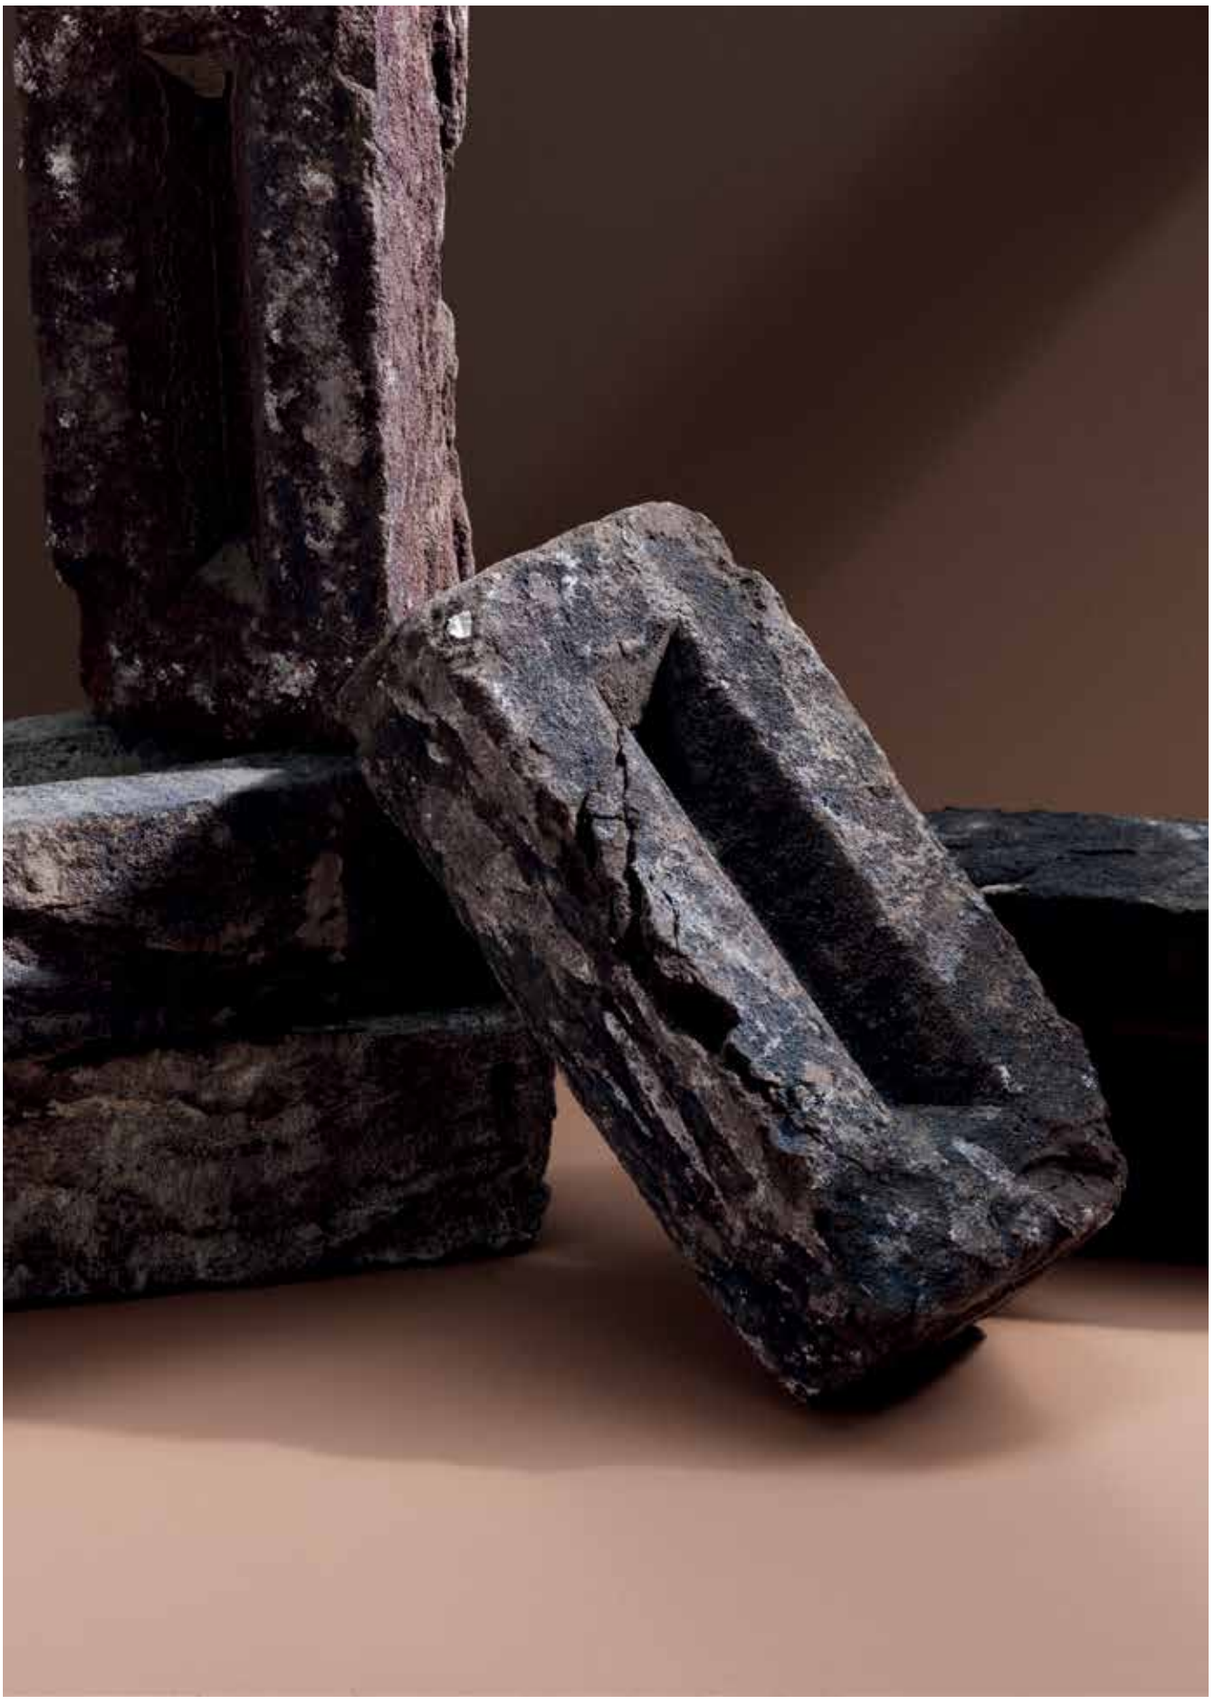
–

These sumptuous bricks originate from Belgium, where they have been carefully crafted by a family of fourth-generation brickmakers of international renown.
–

Made with an exquisite rustic texture, Nelissen bricks are sculptured pieces in themselves. In fact, due to the irregular folded grooves and exquisite colours, each is a genuinely unique work of craftsmanship. Created using a combination of age-old materials, and ultra-modern kiln techniques, Nelissen's multi-shade faces and rich velvety sand surfaces are the result of years of dedicated research and development.

While technology may have changed production techniques over the years the processes have not – using just clay, sand and fire. Each brick is still produced using a careful and intensive hands-on approach, overseen by master technicians and a dedicated Creative Ceramics Department.

The result is a truly stunning range of bricks, which all lend themselves to significant design projects – especially where internal features or larger commercial buildings require a highly-distinctive design statement.



From left to right: Hasselt, Horta, Ostend, Limberg, Mechelen

Rugged Collection – From top to bottom: Freycinet, Tarkine, Huon, Cradle

Overland

Earthy, romantic, and strikingly beautiful, this range has its origins in one of Australia's most magical landscapes.

—

With a rich Tasmanian history, these extraordinary bricks resonate closely with the landscape and earth from where they came.

–

As we move towards a more sustainable future, the need for genuine connection to the land is increasing. What better place to start than the moody landscapes and rich flora of our wild island state; from the dark grey rock formations of the brooding coast of north-west Tasmania, to the warm buff browns of the Huon Valley pines and the red clays and white sands of Freycinet.

This stunning collection has a unique DNA that can be traced back to Tasmania's earliest hand-crafted colonial buildings. Still proudly made in Tasmania, today's cutting-edge techniques are the result of meticulous research and design insights, which has resulted in a range that is proudly carbon neutral.

Just like the magnificent wide-ranging beauty of Tasmania, each brick has been created so each double-face is inherently unique in colour and form, but with an extraordinarily natural 'reclaimed' feel. Much the same as the weathered landscapes that inspired this collection, these bricks will delight for generations to come.

Rugged Collection – From top to bottom: Freycinet, Tarkine, Huon, Cradle

Rugged Collection – From left to right: Tarkine, Cradle, Freycinet, Cradle, Huon, Tarkine, Cradle

Rich, welcoming, dramatic and beautiful, our colour range was simply decided for us by the land and seascapes of this magical place. From ancient rock to forest walks, each is naturally inviting.

Pristine Collection

This collection offers a cleaner feel with fewer imperfections and cleaner lines on facing edges.

Rugged Collection

These bricks are tumbled, making them ideal for projects where a stronger ‘reclaimed’ or gentle ageing effect is required. They have more surface variation, and stronger physical variations with bolder characteristics.

Blends

These bricks offer a stronger contrast to give greater colour variation and depth.

La Paloma

–

Specialty Import

Vibrant, bold and artisan –
from where else but Spain?

–

Available in three different forms, each brick is standard sized but has been refined and tested using innovative techniques and strong architectural design cues.

–

Spain has a history of passion, colour and vibrancy, and that's exactly what La Paloma delivers. Founded in 1979 in the small province of Toledo – an area rich in history and brick architecture – today the company has over 250 employees and is proudly family owned, with an international reputation for quality and innovation.

Challenging conventions, these sophisticated bricks are sleek and contemporary, bringing an element of unique difference to any project. This is due to the careful use of minerals and clays which are prepared and crushed to create an exceptionally high-quality fine finish.

Created using a sophisticated technical process and shaped to provide stunning contrasts, each brick is a beauty to behold.

Beautiful as architectural feature highlights, and equally elegant as a feature wall or facade, this collection is designed to inspire creative bold expressions in any environment.

From left to right: Miro (Tash), Azul (Curved), Miro (Comb)

Tash

–

Developed in collaboration with architects, Tash was created for sheer design expression while retaining all the durability and ease of care of traditional bricks. La Paloma is rightfully proud of the impact this brick is making in bespoke built environments around the world – harmonising the relationship between people and place.

Below: Tash

This page: Miro (Tash)

This page: Azul (Curved)

Above: Curved

Curved

–

Gently curved, this brick is a beautiful object in itself – yet when combined into a colour plane it results in a spectacular sculptural statement which, thanks to its ‘hand-woven’ appearance, feels naturally at home anywhere. With a wide range of possibilities, designers can create bespoke and genuinely creative expressions.

Comb

–

Consistent in its tonal form, yet eye-catchingly brilliant, Comb was another brick created with the insights of architects and the experience of La Paloma's master brickmakers. Architects have enjoyed the flexibility that these bricks offer – from simple colour planes to richly textured highlights by laying the bricks in both ways horizontally and vertically, highlighting their subtly different colour tone variations.

BOWRAL BRICKS

A contemporary update of a firm favourite.

–

A contemporary refresh of a well-loved classic, our Bowral Blends collection has stood the test of time – quite literally.

–

A firm favourite for over 100 years, this enduring Australian classic now gets a refreshing update, with new styles to suit any project that requires beautiful, long-lasting designs.

The result of generations of local brickmaking expertise, combined with both timeless contemporary colour selections, Bowral Blends are specifically created to add confidence and a touch of refined luxury to any building project.

Often used to add design depth to commercial projects due to their colour variations and vibrantly rich tones, they are both a historical reminder of Australian brickmaking heritage, coupled with forward-thinking sustainability.

Panorama 50

A thinner profile for a contemporary classic.

Slim and tall, Panorama 50 allows cleaner, longer lines than traditional brick sizes. Modern, bold and versatile, they are loved by designers, architects and builders.

–

The Panorama 50 Collection has an outstanding reputation for bringing finesse and elegance to modern builds. With a longer length, but thinner profile, they work well inside or outside for striking feature walls or exterior cladding.

From horizontal clean lines to herringbone, the Panorama 50 Collection is as versatile as your imagination. With bold, contemporary colours in tasteful hues, these beautifully strong bricks are ideal for expressing design ideas, or creating exciting colour fields.

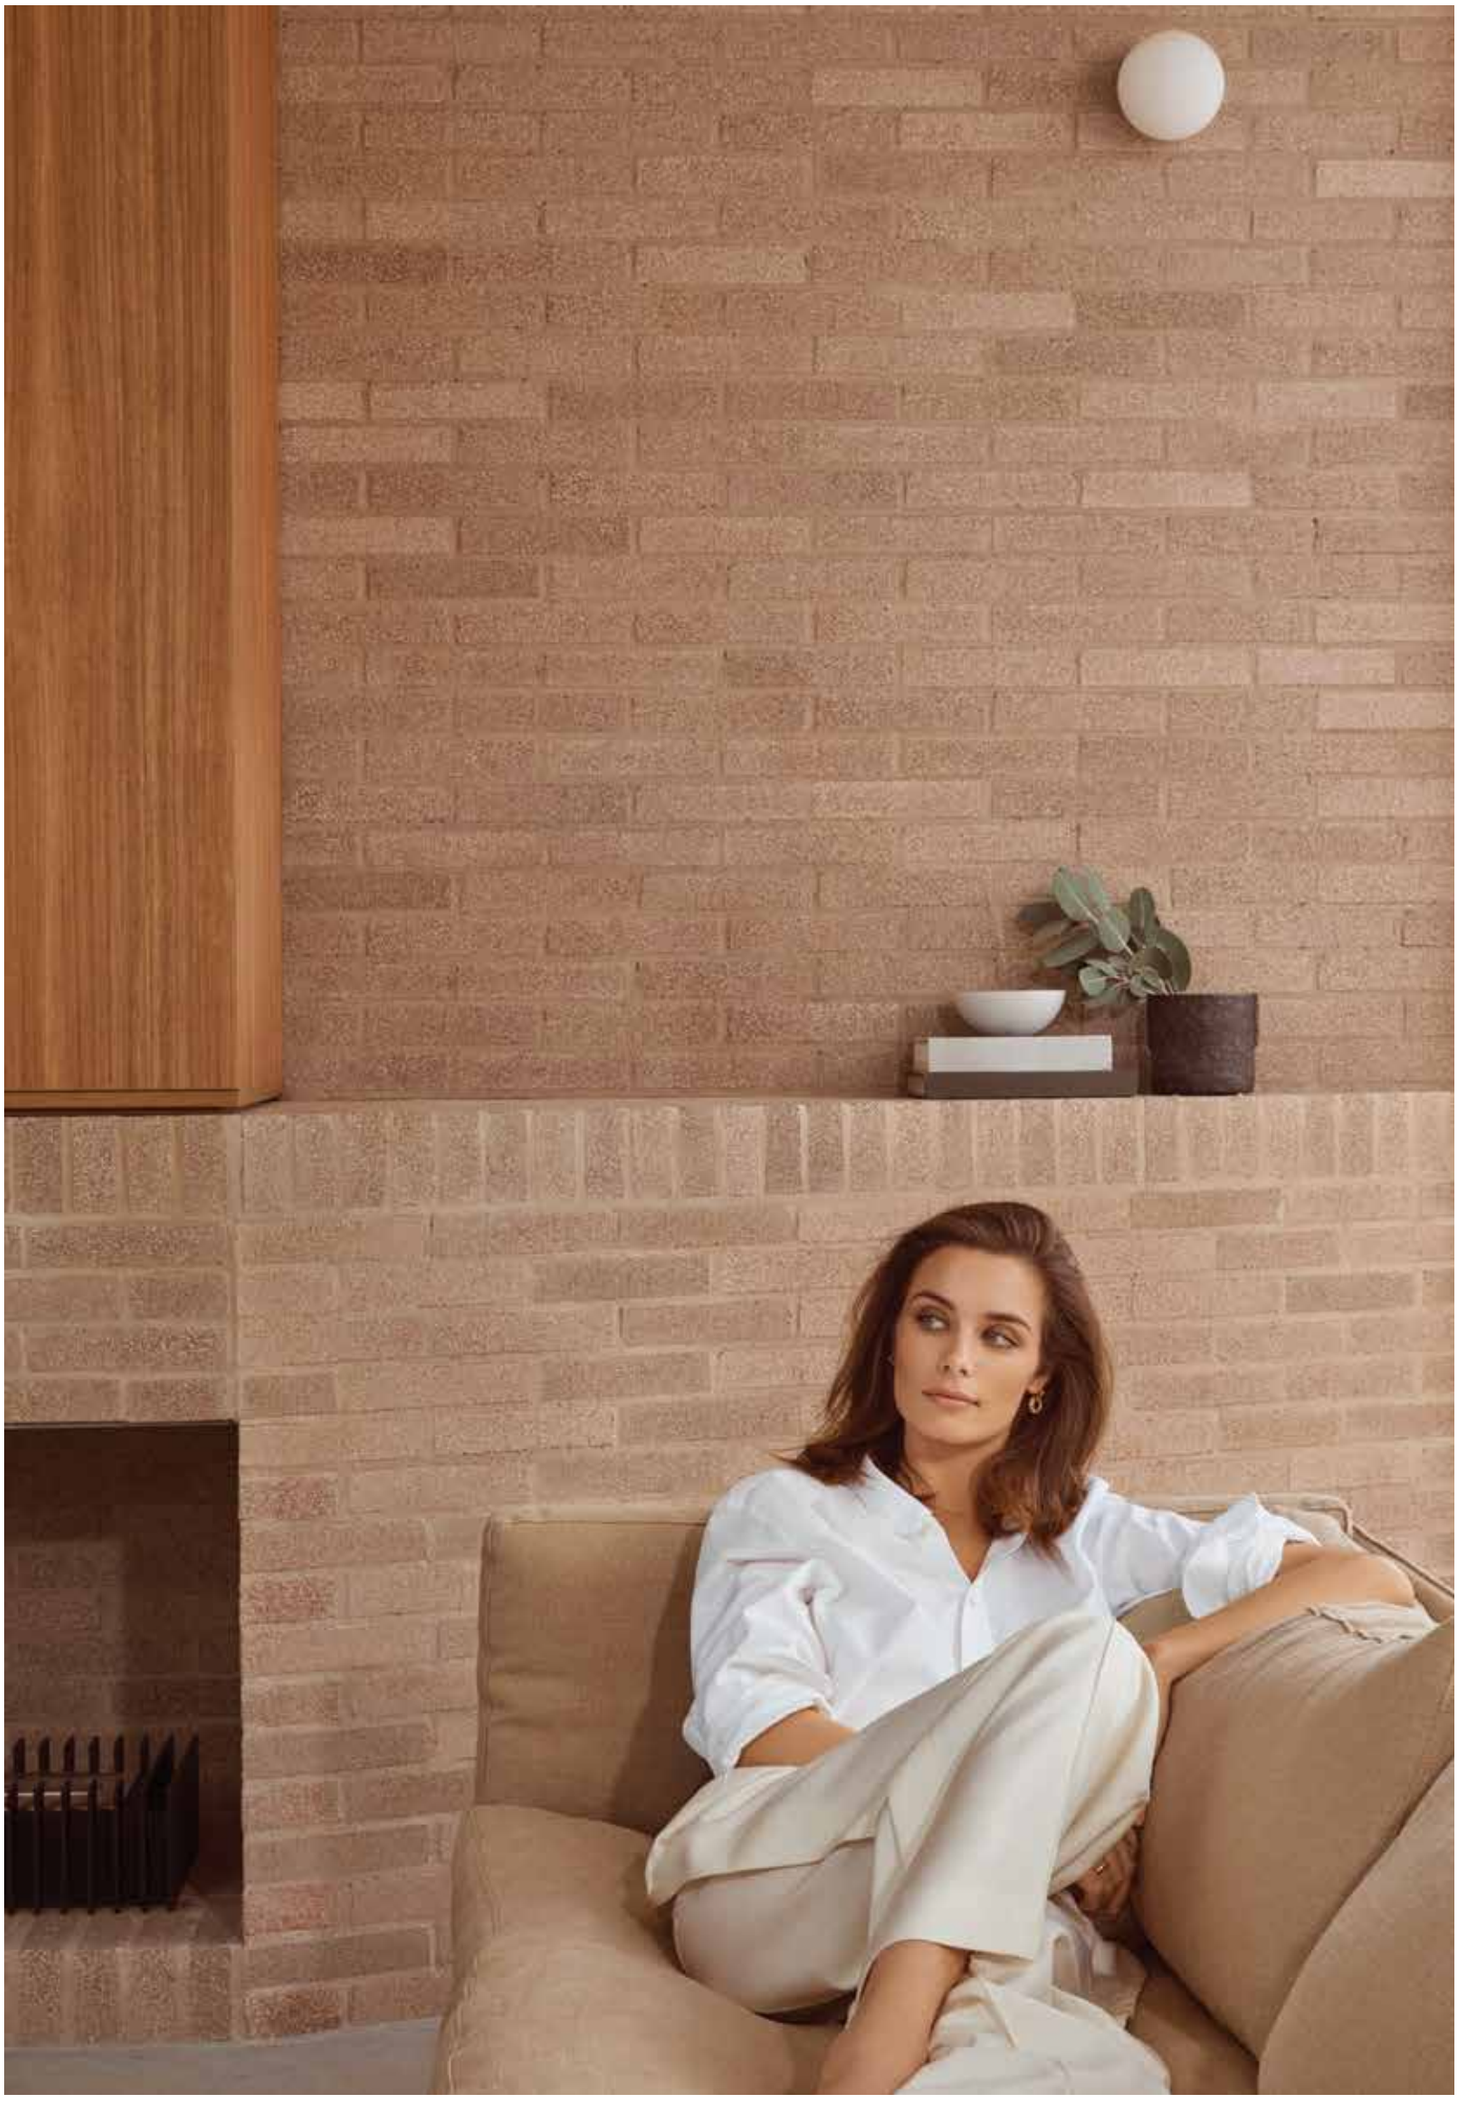
3



The Benefits

When planning to build a sustainable home and a comfortable life, you have a lot to consider. With their complete range of cost, comfort and style benefits, bricks are the one and only choice.

1.
Bricks last forever

2.
Bricks can be reused or recycled

3.
Bricks are maintenance free, they don't fade, rot or rust

4.
Bricks are fireproof, unlike glass and fibre cement that shatters and fails

5.
Bricks are known for their outstanding durability and colour-fastness for life

6.
Bricks are a thermal battery keeping your home cooler in summer and warmer in winter

7.
Brick homes are more energy efficient than those constructed with lightweight materials

8.
Bricks have excellent sound reducing qualities

9.
Bricks are the natural healthy choice as they breathe and allow moisture to escape. Bricks emit no VOC's

10.
Our Bricks are guaranteed for 100 years
